- Ø **Easy to use design**
- Ø **Compliant with CDs / DVDs / 8 cm disc / business cards**

Label CD/DVD

Duplicate CD/DVD

Premastering CD/DVD

Serial Edition

Allwena *Scribe* is a compact automatic system for duplicating and labeling discs including :

1 recorder that comes with LightScribe's technology embedded.

Duplicating and labeling CDs and DVDs are easier than ever.

You'll be labeling your creation in minutes.

Specially designed for photographers and musicians, this robot is perfect for small series or unique discs. The LightScribe technology lets you personalize each disc printed.

Allwena *Scribe* is linked to the PC with a single USB cable.

### Allwena *Scribe*, burns and labels : Burn, Flip, Burn

Thanks to the powerful software suite included with Allwena *Scribe*, you can now automatically burn the numbers of copy desired, then flip the discs and automatically label them. The burning process is controlled by a real-time analysis of blank medias. Personalization of each disc is possible for a maximum gain of time. A file stored during a previous project can be replaced or renamed in just a few clics. Changing a price list for example can be done in seconds. Discs that failed during the burning or printing process are automatically rejected.

### Ideal for professional who requires precision

LightScribe labeling technology also lets you pre-print the discs (in example : a full picture), then keep the discs until content is ready to be burned and then add the name of each customer at the good place on the prep-printed disc. Allwena *Scribe* is the perfect product for wedding's photographers who can pre-print discs with a picture of the couple, then take the pictures of the wedding and print automatically each name of each guest on each disc. Allwena *Scribe* is also the good product to record, store and send music projects to producers, maps, schemes, plans for architectural firms, estate agencies, ...

### Diversity of media

All the Lightscribe medias can be used on the Allwena *Scribe*. It is now possible to label red, green, blue, orange, and even golden background discs. Compliant media can be found at the reseller's next door with the warranty that it will work on Allwena *Scribe*.

Usual media can also be used on the Allwena *Scribe*. without the labeling possibilities. The patented technology of the input bin lets you use CDs, DVDs but also 8 cm discs and business cards as easy as with a common disc.

### Specifications

Input bin	approx. 25 discs (depending on the width of the CDs or DVDs)
Recorder :	1 CD/DVD/Dual Layer recorder – Burning Speed : 48X CD / 16X DVD minimum
Labeling :	LightScribe Direct Disc Labeling technology embedded
Software for premastering	Droppix Recorder XE Publisher special edition for Allwena Scribe
Robotic:	MTBF ~100,000 cycles (not including the recorder)
Electrical information	115V/230V - 50-60Hz - 200 W
Dimensions	18cm(H) x 22.7cm(W) x 40cm(D)
Package size	30.5cm(H) x 38cm(W) x 34.5cm(D)
Weight	4 kg (gross), 3 kg (net)
Environnement	Temperature: 5°- 35°C Humidité: 0 %-80%
